PROFESSIONAL EXPERIENCE

Java Development Student SOFTWARE DEVELOPMENT ACADEMY

Jul 2018 – Mar 2019

I took the "Java from scratch" course with Software Development Academy where I studied Java as a main topic and followed the below study modules:

- Java basics and advanced including: OOP, collections, exceptions
- Developer's tools: Version Control Systems (GIT), Introduction to JVM, Introduction to HTTP
- Databases: SQL, noSQL, JDBC, Hibernate
- Server side: Server Basics, HTML, CSS, JSP and Servlets,
- Spring: inversion of control / dependency injection

Relevant Projects:

<https://github.com/correndonomundo/22Xsi0> – a TicTacToe project intended to deploy OOP concepts

<https://github.com/correndonomundo/TicketManager> – a tickets management tool created to get familiar with database operations (CRUD) on a MySQL database using JDBC.

<https://github.com/correndonomundo/travelAgency> – a Spring and JSP web app enabling hotel and flight reservations, persisted in a MySQL database using Hibernate

Android basics student

UDACITY

Oct 2017 – Jul 2018

I was part of a program offered by Udacity in partnership with Google. The program was designed to teach Android Basics and it offered the opportunity to get familiar with basic Java concepts and Android Framework following the below chapters:

User Interface / User Input

Multi screen apps

Networking

Data storage

Relevant Projects:

<https://github.com/correndonomundo/bucaresttour> – an android app presenting by category sites of Bucharest, developed to understand navigation in multi screen apps

<https://github.com/correndonomundo/NewsApp> – an android app that pulls news from 'The Guardian', enabling news category filter (sports, politics), developed to understand networking concepts and get familiar with JSON data-format

<https://github.com/correndonomundo/inventory2> – an android app that enables customers to buy books, but also allows users to handle the inventory of a library and place calls to suppliers. Book data persisted with SQLite

Business support controller

MICHELIN

Sep 2018 – Present

The activity consists of providing accurate trade related information to management, with a focus on deferred rebates and sales forecast. For this purpose I make verification of forecast reports and verification on rebates accuracy, including forecast versus provisions reconciliations and provision versus actuals reconciliations.

Acquired skills: MS Access, various Oracle applications (user side)

Accountant / Accounting trainer

GENPACT

Oct 2007 – Sep 2018

On the accounting side I was in charge of payments, accounting booking, verification, accruals, corrections, reconciliations and reporting.

On the training side I was in charge of accounting training, soft skills training for employees, plus learning & development events.

Acquired knowledge / skills: corporate finance and accounting, SAP (user side) presentation skills, training skills, event management

EDUCATION

Bachelor Degree
